

Connecting Research
and Researchers

Quiénes somos, qué ofrecemos, para quién, qué hemos hecho, qué haremos, cómo unirse

Septiembre 2013

Laurel L. Haak, PhD
Executive Director, ORCID

L.Haak@orcid.org

<http://orcid.org/0000-0001-5109-3700>

La comunidad investigadora ha perdido la capacidad de enlazar los investigadores con sus actividades profesionales.

- Descubrimiento en y entre bases de datos
- Gestión del registro de PDIs
- Seguimiento de los resultados
- Informes de investigación y evaluación de la investigación

- ORCID es una organización *international, interdisciplinar, open, sin ánimo de lucro, community-driven*. Colaboramos con investigadores y asociaciones de la comunidad para ofrecer un registro de identificadores persistentes de autor.

- El identificador único y persistente ORCID puede ser usado a la largo de toda la trayectoria profesional del autor incluso si cambia de afiliación
- Es incrustado como metadato y es independiente de cualquier plataforma
- La incrustación mejora la interoperabilidad – entre disciplinas, organizaciones y países
 - *Reduce el trabajo del investigador al redactar informes*
 - *Automatiza el depósito en el repositorio*
 - *Ayuda a redactar informes institucionales*

Qué es un identificador ORCID?

- Único y persistente
- Número de 16 dígitos
- Expresado como http URI
- Compatible con norma ISO

IMPORT WORKS

ORCID has been working with many member organizations to make it easy to connect your ORCID iD, and import information from their records. Choose one of the imports wizards to get started.

CrossRef Metadata Search

Search CrossRef's comprehensive metadata on journal articles, conference proceedings and monographs. Easily add search results to your ORCID profile.

Europe PubMed Central

Europe PubMed Central (Europe PMC) offers this tool to enable you to link anything in Europe PMC to your ORCID. Europe PMC contains all of PubMed, 500K records from Agricola that cannot be found in PubMed, 4 million Patents and 2.6 million full text articles that we share with PMC in the USA.

ResearcherID

ResearcherID is a global, multi-disciplinary scholarly research community where members can register for unique identifier, build a profile of their scholarly works, view citation metrics, and search for like-minded researchers.

Scopus to ORCID

Import your Identifier, profile and publications. The wizard helps you find the correct Scopus profile and to confirm your publications. You can then import the identifier and list of publications into ORCID. Any changes you make will be submitted to the Feedback team to update your Scopus profile.

- Nuestra misión es ofrecer ***un registro abierto de identificadores únicos y persistentes para investigadores Y automatizar los enlaces a los trabajos de investigación.***
- Además del registro, ofrecemos una API pública y una de miembros para integrar el identificador ORCID en los CRIS e ***incrustarlos en los flujos de la investigación.***

- **API Pública**

- No es necesario código de acceso ni registro
- Sólo se accede a la información pública
- Sólo se puede READ

- **API Miembros**

- Es necesario código de acceso y registro
- Con permisos, se accede a datos marcados como limited
- Se puede READ, EDIT, APPEND.

Identifiers in Science

Information technology offers new ways to link scientific resources over the internet. A requirement of addressing objects is to use persistent identifiers for (digital) objects. The use of persistent identifiers greatly enhances discovery of resources, data mining and exploratory data analysis.

In the past literature, data, and samples were semantically connected only in our minds. Semantic web technology and the application of unique and persistent identifiers in the geosciences will aid discovery through systematic data mining, exploratory data analysis, and serendipity effects.

www.gfz-potsdam.de
 www.ldeo.columbia.edu
 www.iedadata.org

Identifiers for Publications

A digital object identifier (DOI) is used to uniquely identify an object such as an electronic document. The DOI for a document is permanent, whereas its location may change.

Most of the scientific literature is already identifiable by DOI.

**DOI for data**

DOI are also available for data. In analogy to literature, the DOI identifies a data object or a collection of data.

DOI for data are operated by DataCite and are assigned by major research libraries and data centres worldwide. Data that have been assigned a DOI are citable and become part of the record of science.

www.datacite.org

Identifiers for Authors

Unique identifiers for authors are important to uniquely attach a person as author or contributor to research objects such as datasets, equipment, articles, media stories, experiments, patents, and notebooks. Author IDs make it possible to distinguish researchers with similar names to unambiguously link them to research activities and research grants.

Several types of author identifiers are currently in use: ORCID, VIAF, ISNI, and others. ORCID and ISNI are interoperable. VIAF is maintained by the national libraries.

International Geo Sample Number - IGSN

Most data in the geosciences are derived from samples. It is crucial to be able to identify the samples from which data were derived.

The International Geo Sample Number (IGSN) provides solutions to the questions of unique sample identification and discovery.

Use of the IGSN allows building links between samples and their related data in the literature and in web accessible digital data repositories.

The IGSN is operated by the International Geo Sample Number Implementation Organization - IGSN e.V.

www.igsn.org

Future Developments

The successful application of persistent identifiers for the identification of literature, data, authors and samples can now be transferred to other use cases.

Identifiers for scientific cruises, analytical instruments and analytical methods have the potential to greatly enrich published research results.

Cruise IDs

At present scientific cruises or expeditions in most cases are not uniquely identifiable and cannot be linked to results and materials from these cruises.

An example of a catalogue of research cruises can be found at <http://www.rvdata.us/catalog>

**Identifiers for Instruments and Methods**

Is it a phenomenon, a systematic error, or operator bias? Identification of instruments, methods and procedures will help to enhance transparency and appraisal of analytical results and sensor data.

In addition, instrument and method IDs will be useful in the compilation and interpretation of data synthesis studies and for data mining analytical databases.

- Los investigadores tienen que ver el beneficio de tener un identificador ORCID Y deberían crearlo y reclamar la cuenta ORCID
- Los procesos y sistemas de investigación deberían adoptar ORCID como un identificador de autor estándar, incrustarlo Y enlazarlo con el registro ORCID
- La comunidad investigadora debería apoyar la misión de ORCID mediante su adhesión (membership)

ORCID ha alcanzado más
de 275.000 identificadores
desde octubre 2012.

ORCID as the proposed researcher identifier solution

In 2011, Jisc convened a Researcher ID Task and Finish Group to analyse the need for identifiers for research and to propose a solution for the UK. Informed by a [number of reports](#), the group made a series of recommendations. Chief amongst these was the recommendation that the UK should move to adopt the Open Researcher and Contributor ID (ORCID).

Jisc, on behalf of the group, then commissioned a [consultation with the research community](#), which found broad support for the main recommendations:

► [Researcher ID Consultation Report](#)

On the basis of this evidence, the group of partners has endorsed the following joint statement:

► [Joint Statement](#)

For an outline of next steps see:

► [Draft Implementation Plan](#)

- ORCID ska vara den standard som används för hantering av författaridentifikatorer i SwePub och publiceringsdatabaser.

Se está explorando la integración en la gestión de miembros de asociaciones profesionales y conferencias. ORCID has been proposed as a component of FIM and COI systems.

Harvard to Adopt Service to Uniquely Identify Academic Authors

ORCID provides authors with a persistent digital identifier.

May 14, 2013— Harvard announces its support of a new initiative to provide researchers with access to a persistent digital identifier that allows authors to attach their identities to articles, datasets, equipment, media stories, citations, experiments, patents and notebooks.

<http://library.harvard.edu/harvard-adopt-service-uniquely-identify-academic-authors>

Profile Type: PERSON Person

Add your information. Select OK to apply changes and return to previous page, then click Save to submit changes. Select Return to Previous Page to return without any changes. Select Apply and Add Another to continue adding additional items.

ORCID (Open Researcher and Contributor ID) is a nonproprietary alphanumeric code to uniquely identify academic authors. ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized.

Obtaining an ORCID is very easy, free, and takes less than a minute. Go to <http://orcid.org> to register. Harvard is tracking the ORCIDs of its community members to improve management of academic information and enhance services.

Registros de personal

Boston University ha creado registros para su personal (opt-out) y estudiantes (opt-in). Ven el identificador como parte del sistema de personal de la universidad, sistema de acceso, repositorio, tesis y becas.

The screenshot shows the 'PROFILES RESEARCH NETWORKING SOFTWARE' interface. On the left is a search sidebar with fields for 'Keyword', 'Last Name', 'Institution' (a dropdown menu), and 'Division' (a dropdown menu), along with 'Search' and 'Clear' buttons. The main content area displays the profile of 'John M.K. Abbensetts, MD'. It includes a 'Request/Link ORCID iD' button, a photo of the user, and a table of personal details: Title (Assistant Professor), Institution (Boston University School of Medicine), Department (Surgery), Division (General Surgery), Address (771 Albany St, Boston, MA 02118), Telephone ((617) 414-8000), and Email (kofi.abbensetts@bu.edu). Below the profile are sections for 'Websites' (listing 'Surgery Faculty' and 'Boston Medical Center Physician Profile') and 'Publications' (listing a paper by Mahoney E. et al.). A sidebar on the right shows 'Co-Authors' (Agarwal, Suresh; Burke, Peter; Dechert, Tracey; Glantz, Andrew; Mahoney, Eric) and 'Same Department' (listing Glantz, Andrew; Mahoney, Eric). At the bottom left is the 'BOSTON UNIVERSITY ORCID' logo.

Add ORCID iD to university personnel system

Transferencia de datos c

The banner features the text 'Boston University Research Open Researcher & Contributor ID Project' in a blue header. Below this, it says 'BU Profiles $\leftrightarrow$ ORCID Synchronization'. A message reads 'Hello Test User Account.' followed by 'Your public ORCID record can be viewed at' and a link to 'http://orcid.org/0000-0003-0423-208X'. At the bottom, there is a link to 'Transfer biographical information & publications to ORCID'.

New ORCID-integrated data citation tool

Posted May 13, 2013 by [Gudmundur Thorisson](#) & filed under [Uncategorized](#).

We are pleased to announce the beta launch of a new service for searching and claiming works in DataCite:

<http://datacite.labs.orcid-eu.org>

The tool enables users to search the [DataCite Metadata Store](#) for their works, and subsequently to add (or claim) those research outputs – including datasets, software, and other types – to their ORCID profile. This should increase the visibility of these research outputs, and will make it easier to use these data citations in applications that connect to the ORCID Registry – [ImpactStory](#) is one of several services already doing this.

The new service also provides formatted citations in several popular citation styles, supports COinS, links to related resources, and displays the attached

[Creative Commons](#) license where this information is available. In addition to datasets, the DataCite Metadata Store of course also contains many text documents from academic publishers and services such as [figshare](#) or [PeerJ](#)

Recent Posts

- NIH va a incluir el identificador ORCID en SciCV este mes
- El US Department of Energy ha integrado ORCID.
- Wellcome Trust ha integrado ORCID en eGrants
- El Australian NHMRC ha integrado ORCID en RGMS, sistema de solicitud de becas.

The screenshot shows the 'wellcome trust eGrants' website. On the left is a navigation menu with links like 'Return to Log In', 'Information', 'Help', 'eGrants FAQ', 'Registered Administrative Organizations', 'Sample Application Forms', 'Grant Conditions', and 'Policies and Procedures'. The main content area is titled 'REGISTRATION' and shows a progress bar with three steps: 'Step 1: Verify Email Address', 'Step 2: Your Personal Details', and 'Step 3: Your Career Summary'. Below the progress bar, it says 'Step 2 contd.' and 'Orcid Registration (Optional)'. There is a section for 'ORCID' with a description: 'As part of your registration you can include an ORCID id, or register for one. ORCID is a not-for-profit initiative that has established a global, open registry to provide persistent, unique person identifiers for researchers and contributors to research and associated funded activity. ORCID covers all disciplines and research sectors. Read More.' Below this, it says 'The Wellcome Trust supports ORCID as building unique persistent IDs into the research infrastructure which have the potential to increase immense efficiencies to the research ecosystem. By a registration, we will be able to pre-populate your ORCID profile with any awarded grant details.' At the bottom, there are three buttons: 'Verify existing ORCID id', 'Register for ORCID id', and 'Skip this for now'.

Add your ORCID ID to RGMS

Researchers with an Open Researcher and Contributor ID (ORCID) can now include this in their RGMS user profile. ORCID allows researchers to create a unique identifier for themselves to assist funding agencies, journal editors and other groups involved in scholarly communications.

Metodología para conectar las publicaciones científicas con los agentes que financian la investigación

HOW FUNDREF WORKS

1. FundRef Registry provides a taxonomy of 4000 standardized funder names.
2. Manuscript tracking system vendors incorporate FundRef Registry into the publication submission processes. Publishers ask authors to select correct funders and provide grant numbers upon manuscript submission.
3. Funder information transferred to publisher production systems.
4. Publishers send funder information to CrossRef
5. Funders and others query CrossRef and receive DOIs and metadata for articles resulting from their funding.
6. Publishers may display FundRef data in CrossMark Record tab.

Standards and Infrastructure for Innovation Data Exchange

(2012) Haak, Baker, Ginther et al. *Science*

[highly saved](#)[highly discussed](#)

- Joint statement on interoperation
- Plan de implementación técnica en 3 fases:
 - enlazar ISNIs con los registros ORCID
 - crear herramientas para extraer metadatos de bases de datos
 - implementar la búsqueda autenticada y enlazar ORCID iDs con ISNI y comprobar si se pueden revisar y validar y los registros de ISNI .

2013 Roadmap

Q3

Launch Multi-Assertions WG

Launch UI in Spanish, French,
Chinese

New Features: Affiliations, Proxies

Q4

Complete multi-assertions requirements

Host October Outreach Mtg

New Features: Grants

Estandar: Una organización puede unirse como miembro *basic* o *premium*. Descuento para organizaciones sin ánimo de lucro.

Consorcios o Proveedor de servicios: Una organización líder coordina la suscripción y la implementación técnica con los participantes. Estos tienen que ser miembros de ORCID, *basic* o *premium*. La cuota se basa en el número de participantes. Descuento para 5 o más.

Nacional: Una organización líder coordina la suscripción y la implementación técnica con los participantes. La cuota se basa en el PIB.
